## Security and Beauty All In One

Illusions Vinyl Fence is compliant with ASTM F964-09, which is considered the "end all, beat all" testing specification for Vinyl fence. The purpose of this specification is to establish a recognized standard of quality for exterior Vinyl profiles for use in assembling agricultural, commercial, and residential fencing and railing.

100% Pure Virgin Vinyl Illusions Fences are manufactured to the highest testing standards in the world. Created to maintain their structural integrity and color retention over years and years of use. This rigorous testing has made Illusions a perfect fit for Landscape Architects and Fence Contractors for all commercial fence applications.

## Mix 'n' Match™ Curves & Colors

Illusions® Vinyl Fence Mix 'n' Match™ Curves & Colors System isn't just a clever marketing tool dreamed up by ad execs to sell more fences. It provides a real life, project by project solution to compliment the property or structures of any given installation. Notice in the above photo how the arches of the VBF300-6BW fence perfectly compliment the arched windows of the building. Then notice how the white rails and posts with beige panels match the framing around the windows and doors.

# SPECIFICATIONS

## WHAT IS ASTM F964-09?

### Scope

ASTM F964-09 is considered the “end all, beat all” testing specification for Vinyl fence. The purpose of this specification is to establish a recognized standard of quality for exterior Vinyl profiles for use in assembling agricultural, commercial, and residential fencing and railing. This specification covers **Illusions® Vinyl Fence** sections and the EverStrong Profiles used to fabricate them.

### Materials

**Illusions® Vinyl Fence** Products are manufactured using Rigid Poly Vinyl Chloride (PVC) compounds for exterior-profile extrusions that meet the requirements of ASTM Specification D4216.

### Manufacture

**Illusions® Vinyl Fence** Products are manufactured to meet cell Class 1–32333–3 as defined in Specification D4216. **Illusions®** compounds have higher cell classification because one or more properties are superior to those used in standard acceptable compounds.

**Color/Consistency Testing** – The PVC compound in extruded section shall maintain uniform color and be free of any visual surface or structural changes, such as peeling, chipping, cracking, flaking, or pitting after weathering at intervals of six months and one year for white and for six months, one year, and two years for all other colors in hot, dry climate such as Phoenix, AZ; a hot humid climate, such as Miami, FL; and a temperate northern climate, when tested in accordance with ASTM Performance Weathering Requirements (TABLE 1).

**Weathering Testing** – The PVC compound shall have a minimum impact resistance of 0.6 in.-lb/mil (2670 J/m) after weathering six months and one year in a hot, dry climate such as Phoenix, AZ; a hot, humid climate, such as Miami, FL; and a temperate northern climate, when tested in accordance with ASTM Performance Weathering Requirements. The PVC compound shall have successfully met the weathering requirements prescribed for six months at each climatic testing site prior to use in production of exterior-profile extrusions, when tested in accordance with ASTM Performance Weathering Requirements (TABLE 1).

## ASTM Specifications Met

- D256** – To determine Izod impact properties
- D618** – Practice for Conditioning Plastics for Testing
- D635** – Test Method for Rate of Burning and/or Extent and Time of Burning of Plastics in a Horizontal Position
- D638** – To determine tensile properties
- D648** – To determine heat distortion temperature
- D696** – Test Method for Coefficient of Linear Thermal Expansion of Plastics Between 030°C and 30°C with a Vitreous Silica Dilatometer
- D790** – To determine flexural properties
- D792** – To determine specific gravity
- D883** – Terminology Relating to Plastics
- D1435** – Practice for Outdoor Weathering of Plastics
- D1600** Terminology for Abbreviated Terms Relating to Plastics
- D1784** – Specification for Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly (Vinyl Chloride) (CPVC) Compounds
- D1898** – Practice for Sampling of Plastics
- D2240** – To determine Shore hardness values
- D2244** – Practice for Calculation of Color Tolerances and Color Differences from Instrumentally Measured Color Coordinates
- D2565** – Practice for Xenon-Arc Exposure of Plastics Intended for Outdoor Applications
- D4216** – Material Class Number 1-32333-3. To establish Cell Classification of PVC material. Illusions compounds have higher cell classification because one or more properties are superior to those used in standard acceptable compounds
- D4226** – Test Methods for Impact Resistance of Rigid Poly-(Vinyl Chloride) (PVC) Building Products
- D4726** – Specification for Rigid Poly(Vinyl Chloride)

(PVC) Exterior-Profile Extrusions Used for Assembled Windows and Doors

**E-84-04** – Used to determine the flame spread value of PVC material; **Illusions®** burn rate is significantly lower than allowed value

## Quality Assurance

**Illusions® Vinyl Fence** Products are run through a series of dimensional and color tests that are performed at least every two hours. Testing includes; flattening, extrusion quality, impact resistance, warp, color comparison with standard color samples, capstock thickness, and bond testing. All will be done at the startup of a production and once per shift thereafter with a minimum of two tests per 24 hours of production.

**TABLE 1 - Required Exposures for PVC Extrusions - In Process**

Color of PVC Extrusions	Exposure Climate	Required Exposure Times, Months*
White	hot, dry (Phoenix, AZ)	6 and 12
	hot, humid (Miami, FL)	6 and 12
	northern temperate	6 and 12
Any other color	hot, dry (Phoenix, AZ)	6, 12 and 24
	hot, humid (Miami, FL)	6, 12 and 24
	northern temperate	6, 12 and 24

\*It is recommended that separate specimens be used for each exposure time.

THESE ARE THE RESULTS FROM AN ACCELERATED WEATHER TESTING CHAMBER IN LABORATORY CONDITIONS

## The *Illusions®* Vinyl Fence Advantage

This test is run according to ASTM Standard G-155, Cycle #1. All *Illusions®* Vinyl Fence Product is guaranteed to be made from 100% Pure Virgin Vinyl and assembled according to ASTM F964. Please note the difference in color retention and be assured, *Illusions®* Vinyl Fence will have uniformed color and be free of any visual surface or structural changes such as: peeling, chipping, cracking, flaking, or pitting after weathering.

Be assured! Insist on *Illusions®* Vinyl Fence Products.

# 75MPH WIND KITS™

**What is the Miami-Dade County High Velocity Hurricane Zone Wind Certification and why is it important for commercial applications?** - Due to intense hurricanes, the building code specifications for Miami-Dade County, Florida are considered to be the most stringent in the nation. This certification provides an extreme competitive advantage that allows for safer installation, more customer confidence, increased closing ratios and decreased repair costs.

## HEAVY DUTY POSTS THE STRENGTH BEHIND THE SYSTEM

### Majestic™ 8" x 8" and 5" x 5" Heavy Duty Posts

At a whopping .250" wall thickness, the Illusions® 75MPH Wind Adaptor Kit's strength is rooted in the structural integrity of the Illusions® 100% Pure Virgin Vinyl Heavy Duty Posts. With the consistent high quality structural properties of pure virgin vinyl as the basic building block, it's no surprise that Illusions® products easily passed the rigorous testing for the Miami-Dade County Hurricane Zone Certification.

## Illusions® 75MPH Wind Adaptor Kit Patent Pending

Will it hold up to an F5 tornado? Probably not. But in order to be certified, it had to sustain gusts up to 130 MPH for as long as 30-40 seconds. The Miami-Dade 75 MPH certification states that when properly installed, approved styles of Illusions® fencing can withstand sustained 75 MPH winds.

### The Most Available 75 MPH Wind Certified Styles in the World

With 26 Styles available for immediate shipment, Illusions® Vinyl Fence has the most Miami-Dade County High Velocity Hurricane Zone Certified styles of vinyl fence available in the world. All of which are 8' wide panels to speed up installation time. Illusions® is also the only brand in the world that has 75MPH Certified 8' high Vinyl fence sections. Imagine the 8' high applications for pure virgin vinyl products in multiple colors. The variations are endless and the strength and security unmatched.

## QuickShip®

### 26 Styles

With the 75MPH Wind Adaptor Kit properly installed, 26 Styles of Illusions® Vinyl Fences have been independently tested and certified to withstand winds up to 75 miles per hour. This includes our complete line of Privacy (Series V300, V3215, and V3700) up to 8' high. Spaced Picket Styles (Series V400, V352, V700) up to 4' high. **All styles are available for immediate shipment.**

## Illusions Vinyl Fence

### 75 MPH Wind Kit Installation Instructions

#### Items Needed to Complete Installation:

- Selected Illusions Vinyl Fence Style
- Selected Illusions Vinyl Post (VH55 \_\_\_ or VH88 \_\_\_)
- Adaptor Kit
- Concrete Post Mix
- Post Cap Style
- Tools
- Phillips Head Power Screw Driver
- 1/8" Drill Bit
- Post Hole Digger
- Level and String Line
- Temping Bar
- Illusions Vinyl Cap Glue

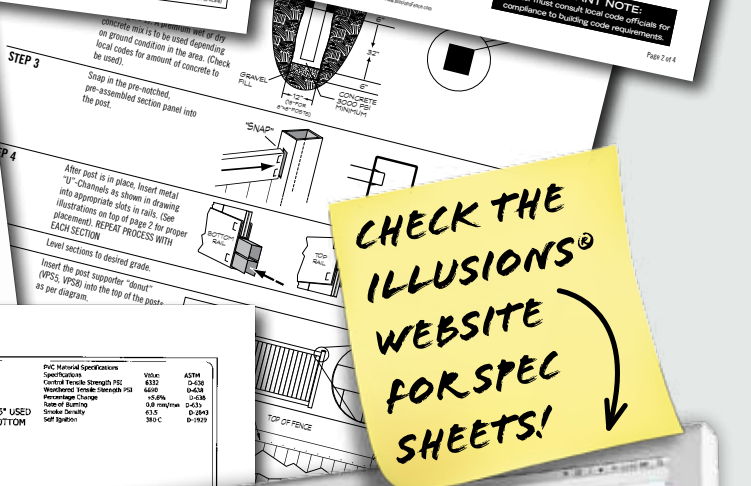

Meets Dade County 75MPH Wind Load Independent Tests.  
8' Maximum Width x 8' Maximum Height.

This installation guide is a recommendation for installing Illusions® Style Fences. For certification of installation to meet 75MPH Wind Load Properties, Always check your local building codes before starting a project and for determining the acceptable installation practices of your area. Read assembly instructions completely before beginning construction. Always wear protective goggles and gloves when installing a vinyl fence.
