Contemporary Picket

456804 - 4' WHITE 3" PICKET - DOG EAR TOP - SCALLOPED
458388 - 4' BEIGE 3" PICKET - DOG EAR TOP - SCALLOPED

Allusions® Contemporary Picket offers what is known as the "good neighbor" approach to fencing for homeowners. It is a fence that features both sides of the panels being exactly the same. It is manufactured to follow the basic picket fence design with an added twist. The pickets are assembled THROUGH the rails instead of simply being attached to them. This is what gives the fence its unique and useful appearance.

Available in heights from 2' to 8'.

Traditional Picket

Allusions® Traditional Picket looks like the traditional "nail-on style" wood picket fence. This face mounted picket panel can be manufactured with three different picket widths. Narrow, standard or wide. These can be assembled with either a regular spacing or a reduced spacing for extra security.

Also available in optional through-rail construction.

Ornamental Picket

Allusions® Ornamental

1" x 1" Picket offers a vinyl alternative to the wrought iron fence. It enables the homeowner to maintain the look of wrought iron without the maintenance. All panels are manufactured with a metal reinforcing channel in the bottom rail for strength that will not fail.

What Makes *Illusions*® Vinyl Products Different?

All the profiles that go into our *Illusions*® line of vinyl fencing are made from extruders using advanced chemistry and state of the art proprietary tooling and manufacturing equipment. All of the polyvinyl components that go into our fence, deck, and railing systems are constructed of scientifically formulated 100% virgin co-extruded vinyl compounds. There are no reprocessed fillers added to weaken or compromise color and structural stability.

Illusions® brand vinyl fencing uses top-grade materials from the nations leading extruders of vinyl products. The materials are a custom blended mix of stabilizers, impact modifiers, processing aids and pigments. Long term weathering studies have shown these products tin stabilized, acrylate modified formulations with high levels of titanium dioxide (a pigment and UV light screener) result in the best retention of color, gloss and toughness.

Our vinyl has the industry leading standard of 10 parts per 100 TiO₂ (titanium dioxide) to give its vinyl the longevity and performance of a lifetime product.

Illusions® Profiles go through the following rigid quality control tests

Visual inspection (Operators & Quality Control)

- Surface
- Straightness

Dimensional Tests

- Quality control charts
- Go/no go gauges
- Critical dimensions and tolerances
- Customer fabrication tool fixtures
- Frequency: every 1-2 hours impact tests
