

WELDED CORNER or ASSEMBLED GATES?

WELDED GATES

Your traditional Illusions Vinyl Gate style is what's known as a Uni-Weld corner gate. Illusions Welded Gates feature an internal truss rod in both the top and bottom horizontal rails for added structural integrity.

This "picture frame" look perfectly follows the look of the top rail or pickets of the matching fence style.

ASSEMBLED GATES

We have added a new gate style to go along with your industry leading Uni-Weld Illusions gates.

These "ASSEMBLED GATES" are a pre-fabricated, non-welded gate with 4" x 4" uprights, and either 2" x 6" or 2" x 3-1/2" rails depending on the style. **Every gate comes with a cross brace and the rails come with metal channels for added structural integrity.**

We have the following in stock and we can make any other style special order in 3 days (except for board on board).

WALK GATES: VAWG300-36 | VAWG300-46 | VAWG300-44 | VAWG3215D-45 | VAWG3215D-46
 DRIVE GATES: VADG300-56 | VADG3215D-56
