

# UNI-WELD WELDED CORNER GATES

Your traditional Illusions Vinyl Gate style is what's known as a Uni-Weld corner gate. Illusions Welded Gates feature an internal truss rod in both the top and bottom horizontal rails for added structural integrity.

This "picture frame" look perfectly follows the look of the top rail or pickets of the matching fence style.

Whether you choose Illusions Vinyl Fence welded gates or assembled gates, you can expect to enjoy the benefits of durability, security, and customization. The decision ultimately comes down to your specific preferences and requirements.

## MATCHING ASSEMBLED GATES

"ASSEMBLED GATES" are a pre-fabricated, non-welded gate with 4" x 4" uprights, and either 1.5" x 5.5" or 2" x 3-1/2" rails depending on the style. Every gate comes with an x-brace and the rails come with metal channels for added structural integrity.
